

UNIVERSITY OF MALTA
HALF DAY SEMINAR

Biomedical Device Design & Manufacture in Malta

Tuesday, 1st June, 2010 at 09.00– 13.00
DOLMEN HOTEL, QAWRA

The Department of Industrial & Manufacturing Engineering (DIME) of the University of Malta is organizing a half-day seminar entitled: **Biomedical Device Design & Manufacture in Malta**. The Department sees the biomedical device industry as one of high-value added and has thus for the last few years been carrying out research in this field funded by the Malta Council for Science & Technology. As a valued stakeholder, you are therefore being kindly invited to attend and contribute your ideas to the seminar discussions. Besides providing you with an insight of results achieved from our MCST Research Project, the seminar will also include presentations from Malta Enterprise on its Life Sciences Park planned for completion in 2013 and opportunities this will bring to researchers and stakeholders of the biomedical industry. More details including the seminar agenda are available at: <http://www.eng.um.edu.mt/~dmeu/seminar/>

The seminar will close by lunch during which participants will be able to network together. Registration for this free seminar is limited to 30 participants and will thus be on a first-come-first-served basis.

To register, please send an email to therese.caruana@eng.um.edu.mt by not later than 27th May 2010.

Prof. Ing. Jonathan C. Borg
Seminar Chair
